

As one of the region's largest and most respected self-performing general, mechanical and electrical contractors, Industrial Contractors, Inc. is looking for talented, team-oriented people to fill following role:

Planner/Scheduler/Estimator

ICI is seeking a planner/scheduler/estimator with a minimum of five years' experience with multidiscipline engineering and construction projects. Qualified applicants will be engineers or construction managers with equivalent work experience. Experience in the metals industry is a plus. This position will be located in customer's metals manufacturing facility in West Virginia. This position is potentially a three year assignment or longer. Candidates should be familiar with the following:

- Project scheduling using Microsoft Projects
- Project schedule development
- Maintenance and outage scheduling in a manufacturing environment
- Project budgeting and estimating
- Interacting with customer management and manufacturing managers
- Interacting with ICI construction personnel and estimators

Candidates must be self-motivated to drive and complete projects from conceptual development through construction completion. Excellent communication skills will be required. Individuals in these roles will interface frequently across customer's organization to complete capital improvement projects. The successful candidates must become knowledgeable of customers' safety policies, acceptable job-site safety practices and enforcement of safety policies. ICI offers a competitive salary and benefits package.

Industrial Contractors offers an excellent benefits package and opportunities for advancement. If interested, please send us your resume.

Industrial Contractors, Inc. is an Equal Opportunity Employer and a Drug Free Workplace.
